1.Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

No.	Device	Type	Real-Life Use Case
1	Printer	Inkjet Printer	Printing college assignments, photos, and colour documents.
2	Printer	Laser Printer	Printing office documents and large numbers of black-and-white pages.
3	Printer	Dot Matrix Printer	Printing bills and invoices in shops and banks.
4	Scanner	Flatbed Scanner	Scanning documents, photos, and certificates.
5	Scanner	Sheet-fed Scanner	Scanning multiple pages quickly in offices.
6	Webcam	Built-in Webcam	Attending online classes or meetings on a laptop.
7	Webcam	External USB Webcam	Live streaming, video calls, and online meetings on a desktop PC.

2.Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth)

**3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage.

Hint: Think about speed, convenience, and compatibility.**

Connection Interface	Advantage ✅	Disadvantage ❌
USB	Fast data transfer and reliable connection.	Requires a cable and USB port.
Wi-Fi	Wireless connectivity and easy sharing over a network.	Performance depends on network quality.
Bluetooth	Convenient wireless connection without cables.	Shorter range and generally slower transfer speeds than USB.

4.

Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

Connecting a Printer to a Computer

Device: Printer

Step-by-Step Instructions

1. Power On: Connect the printer to a power outlet and switch it on.
2. Choose Connection Method: Connect the printer to the computer using a USB cable, or connect both devices to the same Wi-Fi network.
3. Install Drivers: Download and install the required printer drivers from the manufacturer's official website, if necessary.
4. Add the Printer: Open the computer's printer settings and select the Add Printer option.
5. Select the Device: Choose your printer from the list of available devices.
6. Test the Connection: Print a test page to verify that the printer is connected and working correctly.

The printer is successfully connected to the computer and is ready to print documents.

Connection Methods

- USB: Provides a fast and reliable wired connection.
- Wi-Fi: Allows wireless printing without a direct cable connection.
